Faculty Positions in Theoretical Condensed Matter and Cold Atom Physics

Rice University

The Department of Physics and Astronomy at Rice University invites applications for two anticipated tenure-track Assistant Professor positions in theoretical physics. One of the positions is in condensed matter physics, with emphasis on fundamental theory, while the other is in ultra-cold atom physics, with a focus on connections to condensed matter. These positions will complement and extend our existing experimental and theoretical strengths in condensed matter and ultra-cold atom physics (for information on the existing efforts, see <http://physics.rice.edu/>). Applicants should send a dossier that includes a curriculum vitae, statements of research and teaching interests, a list of publications, and two or three selected reprints, and arrange for at least three letters of recommendation to be sent to *R. G. Hulet* or *Q. Si*, Co-Chairs, Faculty Search Committee, Dept. of Physics and Astronomy – MS 61, Rice University, 6100 Main Street, Houston, TX 77005 or by email to vcall@rice.edu. Applications will be accepted until the positions are filled, but only those received by **November 15** will be assured full consideration. The appointments are expected to start in July, 2009. *Rice University is an affirmative action/equal opportunity employer; women and underrepresented minorities are strongly encouraged to apply.*
