

## Postdoctoral Positions are Available in the Laboratory of Cagla Eroglu at Duke University Medical Center, Cell Biology Department, Durham, NC, USA.

The focus of our research is to understand the molecular and cellular mechanisms that regulate central nervous system synapse formation.

For more detailed information on our labs research please go to  
<http://www.cellbio.duke.edu/Faculty/Research/Eroglu.html>  
and follow the link to visit our lab webpage

### Requirements:

We are seeking a highly motivated scientist interested in the development of the nervous system. The applicant should or is expected to have a PhD degree when they plan to join the lab. (Ph.D. must be awarded not earlier than 12 months of the start of the position).  
Experience in cell culture, molecular biology and biochemistry techniques as well as a basic knowledge of fluorescent microscopy is preferred.

### To apply:

Please email your CV and three letters of reference (one of which should be from your Ph.D. advisor) to  
[c.eroglu@cellbio.duke.edu](mailto:c.eroglu@cellbio.duke.edu).
